Pune, Maharashtra, India | +91 7276222984 | chetan.g.patil1622@gmail.com | linkedin.com/in/chetan-patil-914618218 | github.com/chetan1622

## PROFESSIONAL SUMMARY

Master's educated Data Scientist and Machine Learning Engineer with extensive experience in statistical modeling, scalable ML pipeline design, MLOps automation, and deploying production-oriented AI and analytics solutions.

## WORK EXPERIENCE

**MIS Executive Intern** – Ajay Engineering Tools, Pune, India 16 Feb 2026 – 20 Jun 2026

- Developed automated weekly reporting workflows using Google Sheets and Google Apps Script to streamline operational data flow.
- Built interactive Looker Studio dashboards for real-time tracking of team management metrics and stock/inventory levels.
- Performed automated data cleaning and tracking to optimize stock management decisions and executive reporting accuracy.

**Market Research Data Analyst Intern** – Pratiti Technologies, Pune, India Dec 2023 – Mar 2024

- Automated market research data processing pipelines using Python and Advanced Excel across 120+ industry intelligence reports.
- Applied statistical modeling to analyze healthcare IT market trends, AI adoption, and machine learning integration.
- Conducted large-scale exploratory data analysis and feature extraction to generate actionable strategic insights.

**Data Analyst Intern** – Internship Studio, Remote Jan 2025 – Jun 2025

- Built automated ETL scripts and scalable data pipelines to process retail transactional datasets.
- Engineered ER diagrams and dynamic Power BI KPI dashboards, cutting executive reporting time by 25%.

**Data Analyst Intern** – S4S Tech Services, Aurangabad, India Jan 2023 – May 2023

- Developed scalable feature engineering processes and statistical models to maximize production data accuracy.
- Optimized complex SQL queries and automated recurring data analysis and reporting workflows.

## EDUCATION

**Master of Science in Data Science** – Dr. D. Y. Patil ACS College, Pune, India Graduated 2025  
CGPA: 9.09

**Bachelor of Science in Data Science** – MGM University, Aurangabad, India Feb 2020 – May 2023  
CGPA: 7.81

## TECHNICAL SKILLS

**Machine Learning & AI:** Linear/Logistic Regression, Decision Trees, Ensemble Learning, CNNs, RNNs, Transformers, BERT, Foundation Models, RAG, LLM Fine-Tuning, Anomaly Detection, Probabilistic Modeling, Forecasting.

**MLOps & Cloud:** MLflow, Kubeflow, Databricks ML Runtime, AWS SageMaker, AWS Bedrock, Automated Pipelines, Streaming Inference, Online Learning.

**Languages & Libraries:** Python, SQL, PyTorch, TensorFlow, Scikit-Learn, AutoGluon, PySpark MLlib, Pandas, NumPy, Flask, Google Apps Script.

**Data Engineering & Databases:** Distributed Data Frameworks, Feature Engineering at Scale, Query Optimization, PostgreSQL, MySQL, SQLite.

**Analytics & BI:** Looker Studio, Power BI, Tableau, Advanced Excel, Google Sheets, Exploratory Data Analysis (EDA).

## PROJECTS

**Enterprise RAG Platform & LLM Fine-Tuning Pipeline with MLOps** Jun 2026 – Jul 2026

- Fine-tuned Foundation Models (LLaMA/Mistral) using PyTorch, Hugging Face, and QLoRA for domain-specific inference.
- Architected a production RAG pipeline with hybrid retrieval and deployed automated endpoints via AWS SageMaker.
- Orchestrated end-to-end MLOps workflows, tracking experiment metrics, prompt versions, and lineage using MLflow.
- Leveraged PySpark MLlib to process distributed feature data (10GB) for real-time anomaly detection and streaming inference.

**Hybrid NLP Pipeline for Real-Time Sentiment Analysis & Streaming Inference** Jan 2024 – Mar 2024

- Architected a real-time streaming ML application combining rule-based heuristics, machine learning, and BERT models.
- Developed streaming inference pipelines using Python, Scikit-learn, and Pandas for crisis anomaly detection; published in IJARIE.

**HireHunt – AI Job Referral Platform & ATS Engine** Sep 2025 – May 2026

- Engineered an AI-driven automated resume parsing and ATS scoring pipeline using Python, Flask, and SQLite.
- Integrated scoring heuristics and feature extraction to evaluate candidate-job relevance at scale.

## Customer Churn Predictive Modeling

2025

- Deployed predictive models (Logistic Regression, Decision Trees) with Scikit-learn, achieving 80% accuracy.
- Performed distributed dataset cleaning and feature engineering to isolate telecom retention drivers.

## CERTIFICATIONS & LANGUAGES

---

- **Certifications:** Data Analysis with Python (IBM), Career Essentials in Data Analysis (Microsoft/LinkedIn).
- **Languages:** English, Hindi, Marathi.
