

EDUCATION

Dr. D. Y. Patil Institute of Technology

2023 - 2027

B.E. - Mechanical Engineering | CGPA: 6.07 / 10

SMT. M. P. KOTHARI ENGLISH CONVENT HIGH SCHOOL & JUNIOR COLLEGE, Nandura

2023

12th | MSBSHSE | Percentage: 44.17 / 100**BHARTIYA DNYANPEETH HIGH SCHOOL, Nandura**

2021

10th | MSBSHSE | Percentage: 76.40 / 100

INTERNSHIPS

Maruti suzuki | Automotive / Ancillaries / Automobile

05 Jan, 2026 - Present

Developed teamwork, technical observation, and real-world problem-solving skills.

Observed and learned working principles of engine systems, braking systems, suspension, and transmission.

Gained practical understanding of engine systems, braking systems, suspension, transmission, and basic automotive electrical systems.

PROJECTS

MICROPLASTIC DETECTION

This project introduces a low-cost, integrated smart sensor system capable of optical detection of microplastics. It uses a white LED as a light source and an LDR sensor to measure transmitted light intensity through a water sample. The difference in received light intensity between clean and contaminated water is amplified using the LM358 op-amp circuit and processed by an Arduino Uno. The processed signal is then sent to a computer for analysis and visualization using Python and OpenCV.

Study of Existing Battery and Design Optimization for weight Reduction in Lithium ion battery pack

Electric cars (EVs) are the future, but their biggest challenge is the heavy battery pack. This heavy weight reduces the distance the car can travel and wastes energy.

Our project aims to make the battery structure much lighter and more sustainable. We will use advanced materials (like strong, light metals or composites) to shave off significant weight from these non-active component that is battery casing. The expected result is an EV battery pack that is lighter, more efficient, and helps the car drive further without compromising safety or structural strength.

Ergonomical Analysis of Existing Classroom Bench and Desk Design

Ergonomic analysis of classroom bench and desk design addresses the critical need to align furniture dimensions with the anthropometric characteristics of students.

Schools function as primary environments where children spend extended hours, making proper seating essential for comfort, concentration, and long-term health.

Current designs often reflect generic standards, yet empirical studies reveal substantial mismatches between these dimensions and the varied body sizes of students. Such disparities can lead to uncomfortable postures, increased fatigue, and musculoskeletal disorders over time. This report explores the ergonomic aspects of existing classroom furniture, employing anthropometric data and ergonomic modeling to evaluate bench and desk designs. By comparing students' body measurements with the dimensions of widely used furniture models, the study identifies key areas where design improvements are necessary. Ultimately, the findings aim to contribute practical recommendations for developing adjustable or varied-size furniture options, ensuring that the learning environment supports healthy posture and enhances overall student well-being.

ASSESSMENTS / CERTIFICATIONS

Electric Vehicle Master Class

Basic understanding of EV design, operation, and industry trends.

Certification in Electric Vehicle fundamentals including batteries, motors, charging systems, and EV safety.

Electric Vehicle Service lead Technician

Modeling the Acceleration of GM EV1 Battery Electric Car using MATLAB

Hybrid Electric Vehicle

Course Completion Certificate

certification of Participation

Simulink Onramp

Machine Learning Onramp

Create Your First Python Program From UST

SEMINARS / TRAININGS / WORKSHOPS

Electric Vehicle Master Class Institute Name: SkillDzire

29 Jul, 2024 - 02 Aug, 2024

PERSONAL DETAILS

Gender: Male

Marital Status: Single

Current Address: Bajbalkar Empire, Near D.Y Patil Medical college, Pimpri, pune, Pimpri-Chinchwad, Maharashtra, India - 411018

Emails: omdhande8329@gmail.com , omdhande6460@gmail.com

Date of Birth: 01 Sep, 2004

Known Languages: Marathi, Hindi, English

Phone Numbers: +91-8329582381, +91-7276333984

IMs
